Instructions: Fill in the check box for each species recorded. Please include a **B** if you observe the species breeding. We encourage you to put the **count** for waterbirds and waders after the species name. Return the completed form to the office. You can print replacement forms from the website, or ask the office to mail you new forms. The database is designed to record data for BAWA excursions, parks, reserves, wetlands, islands and country shires for periods from a few hours to a week, although in special cases data is recorded per calendar month. If the survey is over a long period, or for many sites in an area then please consider also completing forms for the Ongoing Atlas of Australian Birds. If you cannot be 100% certain of the species of gallinago snipe, white-tailed black-cockatoo, corella, chestnut-shouldered fairy-wren, raven or crow then please use the corresponding general number.
